To whom it may concern,

I am pleased to provide this letter of recommendation for Siam Global, I would like to commend the company for their organised supplying to AS Grade Material. As the structural steel installers for Harvey Norman MacGregor Project in Queensland we found the process for steel arrival for our installation to be fluent and organised. Due to the packing and shipping co-ordination and outstanding communication from the team at Siam Global.

The team had a commitment to compliance and quality which helped the project continue on the right track. Their ability to provide quality Fabrication, workmanship and documentation allowed for minimal issues and/or concerns in our installation process thus allowing us to stick to program and timeframes required.

Their drawings and models were also of a very high standard we had very few follow-up or amendments. This was helpful in co-ordinating the installation process and avoided delays or several onsite variations due to drafting errors.

I believe that Siam Global is an excellent company who we have no hesitation in recommending. For additional details please don't hesitate to contact me on 0430844667 or email drew@armitageservices.com.au

Regards,

Drew Armitage
Director
