RE: CC3 - Siam Global Engineering Co., Ltd & AES Technique Letter of Recommendation

To Whom it May Concern,

Devlyn Construction have recently engaged Siam Global Engineering Co., Ltd & AES Technique on two recent commercial construction projects being the construction of Roebourne TAFE and the construction of the new Bruce Rock Supermarket.

With both projects regionally located (1,563km and 243km from Perth respectively) intricate logistics, programming, quality control and transparent communication was required of all trade partners to meet all project objectives and specifications.

For both projects, the supplied services and products consistently exceeded quality standards while meeting all applicable Australian Standards. During pre-construction, Siam Global Engineering Co, Ltd & AES Technique provides concise structural shop detailing and drawings, allowing for a swift approvals process and no delay to the critical path of the program while maintaining compliance with specifications and direction from the wider design team.

We look forward to working with Siam Global Engineering Co, Ltd & AES Technique again in future, the services provided during tender phase, pre-construction, construction and beyond are of the highest standards.

If you have any queries, please feel free to contact myself,

Best regards,

Nathan Schmiedte,

Project Manager
Devlyn Construction
