### **Letter of Recommendation, CC3 Certification with SCA**

To whom it may concern,

We have been asked to provide a letter of recommendation for Siam Global Engineering Co., Ltd in relation to their application for CC3 Accreditation with Steel Compliance Australia.

We first worked with John and Siam Global during the midst of the Global Covid Pandemic. We were experiencing extreme delays on the supply of materials and were provided with an option by Siam Global that would meet our programming needs. We were initially hesitant about sourcing the material from overseas and the perceived risks this would pose, however our experience was an extremely positive one, and we have continued to work with John and Siam Global for the supply of Structural Steel on other projects since.

The level of service we received was a complete package for the supply & delivery of the Structural Steel, from shop modelling and detailing right through to delivery on site. At every stage communication with John was professional, clear, and timely, and the level of detail provided with any queries or clarifications during the production of the Shop Drawings demonstrated the knowledge and understanding of John and his team.

The quality of steel provided to date has been exceptional, meeting all relevant AS standards, with an impressive high standard of welding and surface treatment. In addition, the care taken with packing and shipping is always evident, with little of no damage on arrival. Shipping timeframe expectations were met, and the provision of clear packing lists, layouts and documentation also made installation on site straightforward.

The provision of QA paperwork to meet Client and Consultant requirements on completion of works has also been extremely helpful.

To date we have worked with John and Siam Global to complete two separate projects, with one additional currently underway:

- Hamer Park & Moyle Pavilion – Two new clubroom buildings in Mount Lawley WA, for the City of Stirling
- Chichester Park Clubrooms – New clubroom in Woodvale WA, for the City of Joondalup
- Piara Waters Library – New library building in Piara Waters WA, for the City of Armadale (currently in manufacture)

We would highly recommend John and his team at Siam Global, they are professional, reliable and dedicated to excellence, and we will continue to work with them on future projects requiring the supply of Structural Steel or Shop Detailing

Kind Regards,
