**Attention:** John Lightbody  
Siam Global Engineering

To whom it may Concern,

I am pleased to provide this letter of recommendation for John Lightbody and his team at Siam Global, a highly commendable provider of structural steel supply services,

I have personally worked with John and his team on a number of projects, ranging from supply of 3D models, to shop detail drawings for fabrication, to complete packages from design, fabrication, surface treatment and shipping to Western Australia.

John and his team commitment to providing the highest of standards on all aspects of the projects, gave me confidence in their able to deliver a quality project to Australia standards and showed that Siam Global Engineering has a team of skilled professional that have the understanding of structural engineering principles.

Whilst being based overseas, I was impressed by the way that SGE were able to communicate and give great technical support via different applications, Zoom, Line, Whatsapp, emails and phone. WCSS were able to access all 3D models / drawing and project documentation at a touch of a screen, on a phone or computer onsite in the Pilbara or in the office in Perth.

The quality of fabrication was to the highest of standards meeting all of WCSS clients requires and their level of documentation & traceability was extraordinary.

SGE procedures for the packing of materials and shipping was impressive, their commitment to ensure that a quality product was delivered, made it a pleasure dealing with John and the team at SGE.

I highly recommend Siam Global Engineering to any organization seeking a top-quality structural steel supply service. Their professionalism, reliability, and outstanding performance make them an asset to any project.

Yours faithfully
