

21/9/23

To whom it may concern,

We appreciate your consideration of our Letter of Recommendation, provided to assist Siam Global Engineering Co., Ltd with their application for CC3 Accreditation with Steel Compliance Australia.

We are Steel Erectors who worked with structural steel provided by Siam Global, to construct the Bruce Rock Supermarket, completed in May of this year. The quality of the product, and the supply services provided were exceptional throughout the project.

The steel was fabricated and treated to a high standard of workmanship and compliance and was packed with consideration to minimize the risk of possible damage that could have occurred during the shipping process. The high quality of the steel supplied, matched with the detail of the structural drawings ensured that our task of assembling the steel could be carried out with optimal efficiency.

It was a pleasure working with Siam Global Engineering Co., Ltd on this project for the Bruce Rock community and I would look forward to any future collaboration.

Sincerely,

A handwritten signature in blue ink, appearing to read "Anton Witschge".
